SOFT SKILLS

- Adaptability
- Analytical thinking
- Attention to detail
- Self-directed learning
- Problem solving
- Clear communication

KEY PROJECTS

Lumingo
Founder & Product Engineer
[Case study](#) · [Live product](#)

VoiceNotes
Solo Android Engineer
[Case study](#) · [GitHub](#)

ABOUT ME

Android Engineer specializing in Kotlin and Jetpack Compose. At MARKET-R, I design and build native Android systems for cashbox, retail, and transport workflows, covering product design, architecture, API integration, security, offline recovery, and release validation. I also founded Lumingo and built VoiceNotes, combining hands-on engineering with end-to-end product ownership and practical AI integration.

HARD SKILLS

- Kotlin & Java
- Jetpack Compose & XML
- Coroutines & Flow
- MVVM / Clean Architecture
- Room / SQLCipher / DataStore
- Retrofit / OkHttp / REST APIs
- Unit & UI testing
- Git & code review

EDUCATION

Tashkent University of Information Technologies
named after Muhammad al-Khwarizmi Sep - 2021
May - 2023

Belarusian State University of Informatics and
Radioelectronics Bachelor's degree (BSUIR) Sep - 2023
May - 2025

Belarusian State University of Informatics and
Radioelectronics Master's degree (BSUIR) Sep - 2025
Present

EXPERIENCE

Android Engineer · Market-R Aug - 2026
Present

- Built two native Android apps for cashbox, retail, and transport workflows.
- Designed Compose architecture for payments, authentication, history, location, and offline recovery.
- Secured sessions and retry queues; integrated REST APIs and validated releases on physical devices.
